## School Transportation-Related Crashes

A school transportation-related crash is a crash which involves, either directly or indirectly, a school bus body vehicle, or a non-school bus functioning as a school bus, transporting children to or from school or school-related activities.

Since 2000 there were 371,104 fatal motor vehicle traffic crashes. Of those, 1,245 $(0.34 \%)$ were classified as school transportation-related.

Since 2000, 1,386 people have died in school transportation-related crashes- an average of 139 fatalities per year. Occupants of school transportation vehicles accounted for 8 percent of the fatalities, and nonoccupants (pedestrians, bicyclists, etc.) accounted for 20 percent of the fatalities. Most of the people who lost their lives in these crashes ( $72 \%$ ) were occupants of other vehicles involved.

Since 2000, 130 school-age pedestrians (younger than 19) have died in school transportation-related crashes. Over two-thirds (67\%) were struck by school buses, 6 percent by vehicles functioning as school buses, and 27 percent by other vehicles involved in the crashes. There were $56(43 \%)$ school-age pedestrians killed in school transportation-related crashes between the ages of 5 and 7 .

[^0]An average of 19 schoolage occupants of school transportation vehicles (6) and pedestrians (13) die in school transportation-related traffic crashes each year.

On average, 10 school-age pedestrians are killed by school transportation vehicles (school buses and non-school bus vehicles used as school buses) each year, and 4 are killed by other vehicles involved in school bus-related crashes.

More school-age pedestrians have been killed between the hours of $3 \mathrm{p} . \mathrm{m}$. and 4 p.m. than any other time of day.

*Includes persons on personal conveyances such as skateboards, scooters, wheelchairs, etc.

From 2000 to 2009, 56 (43\%) school-age pedestrians killed in school transportationrelated crashes were between 5 and 7 years old.

Between 2000 and 2009, 85 crashes occurred in which at least one occupant of a school transportation vehicle died. More than half of those crashes ( $56 \%$ ) involved at least one other vehicle. In the 37 single-vehicle crashes, 43 occupants- 16 drivers and 27 passengers-were killed. In the 48 multiple-vehicle crashes, 26 drivers and 38 passengers died. In the 37 single-vehicle crashes, the first harmful events were as follows: striking a fixed object ( 22 crashes), a person falling from the vehicle ( 5 crashes), the vehicle overturning ( 5 crashes), the vehicle colliding with a train ( 1 crash), other non-collision ( 1 crash), and collision with a non-fixed object (1 crash).

From 2000 to 2009, nearly three-fourths ( $73 \%$ ) of the school-age pedestrians fatally injured in crashes were struck by a school bus or a vehicle functioning as a school bus, while 27 percent were struck by a vehicle of another body type. One-third $(34 \%)$ of school-age pedestrians fatally injured in school transportation-related crashes were struck by a school bus or a vehicle functioning as a school bus that was going straight.

*Includes school bus body type and non-school bus used as school bus.
**Includes 1 pedestrian fatality in which the striking vehicle was not identified.

Since 2000, three drivers and one passenger have died in school bus body vehicles providing transportation for purposes other than school or school-related activities (churches, civic organizations, etc.).

Information on traffic fatalities is available from the National Center for Statistics and Analysis (NCSA), NVS-424, 1200 New Jersey Avenue SE., Washington, DC 20590. NCSA can be contacted at 800-934-8517 or via the following e-mail address: ncsaweb@dot.gov. General information on highway traffic safety can be accessed by Internet users at www.nhtsa.gov/ NCSA. To report a safety-related problem or to inquire about motor vehicle safety information, contact the Vehicle Safety Hotline at 888-327-4236.

Other fact sheets available from the National Center for Statistics and Analysis are Alcohol-Impaired Driving, Bicyclists and Other Cyclists, Children, Large Trucks, Motorcycles, Occupant Protection, Older Population, Overview, Passenger Vehicles, Pedestrians, Race and Ethnicity, Rural/Urban Comparisons, Speeding, State Alcohol Estimates, State Traffic Data, and Young Drivers. Detailed data on motor vehicle traffic crashes are published annually in Traffic Safety Facts: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System. The fact sheets and annual Traffic Safety Facts report can be accessed online at www-nrd.nhtsa. dot.gov/CATS/index.aspx.
