# State Motor Vehicle Fatalities and State Alcohol-Impaired Motor Vehicle Fatalities, 2011 

In 2011, 32,367 people lost their lives on America's roadways in motor vehicle crashes. This figure is 1.9 percent lower than the 32,999 people who died in crashes in 2010 ( 632 fewer fatalities in 2011). Alcohol-impaired-driving fatalities declined by 2.5 percent in 2011. An alcohol-impaired-driving fatality is defined as a person killed in a crash involving a driver or motorcycle rider (operator) with a blood alcohol concentration of .08 grams per deciliter or greater. This percentage decrease was greater than the percentage decrease in overall motor vehicle crash fatalities from 2010 to 2011. The 9,878 alco-hol-impaired-driving fatalities in 2011 accounted for 31 percent of overall fatalities, the same percentage of overall fatalities as in 2010.

The table included in this Crash Stat compares the total number of fatalities, as well as the number and percentage of alcohol-impaired-driving fatalities for 2010 and 2011, the change in the number of total and alcohol-impaired-driving fatalities, and the percentage change for each State, the District of Columbia, and Puerto Rico.

Thirty-six States had reductions in the number of fatalities. Connecticut had the greatest decline in both number of fatalities ( -100 ) and in the percentage of decline $(-31 \%)$ in fatalities. North Carolina saw a decrease of 93 fatalities from 2010 to 2011; however, this was only a 7-percent decline from the 2010 level. Fatalities in New Hampshire fell by 30 percent from 2010 to 2011. California and New Jersey saw increases of 71 fatalities from 2010 to 2011. The greatest percentage increase in fatalities was North Dakota with a 41-percent increase in fatalities (+43).

Nationwide, about one-third (31\%) of the total fatalities were in alcohol-impaired-driving crashes. Twentyseven States experienced reductions in the number of alcohol-impaired-driving fatalities. Four States had declines of 30 or more: Texas ( -57 ), New York ( -45 ), South Carolina (-38), and Tennessee (-31). Conversely, three States had increases of 30 or more: Colorado (+41), Florida (+38), and New Jersey (+33).

Table 1. Total and Alcohol-Impaired-Driving Fatalities, 2010 and 2011, by State

| State | 2010 |  |  | 2011 |  |  | 2010 to 2011 Change |  |  |  |
