## INTRODUCTION

The Thirteenth Annual International Workshop on Human Subjects for Biomechanical Research, was held on October 11, 1985 in Arlington, Virginia. Attendance was about 70 for the seven scheduled presentations and discussion.

Preceding the technical presentations an award was given to David Foust, expressing the gratitude of the Workshop Committee and Workshop participants for the many years of extraordinary service as Workshop Secretary in the preparation of paper abstracts and associated discussion.

This year, due to other pressing obligations, Dave was unable to prepare the meeting minutes. Mike Walsh also was not able to provide a written copy of his material for this printing.

We wish to repeat as we do every year, that papers appearing in these proceedings are not to be considered as formal publications, and hence must not be referenced.

On behalf of the participants and attendees of the Workshop, we would like to thank the STAPP Conference Advisory Committee for its support of this activity, and to the SAE for administrative services and refreshments.

The Workshop Committee
