

INTERNATIONAL WORKSHOP ON  
"HUMAN SUBJECTS FOR BIOMECHANICAL RESEARCH"

Third Annual Meeting  
November 19, 1975  
San Diego, California

4

4

## INTRODUCTORY REMARKS

The Third Annual Meeting of this workshop was held at the Sheraton Harbor Island Hotel, San Diego, California immediately following the final session of the "Nineteenth Stapp Car Crash Conference."

Mr. Marble and the S.A.E. Staff arranged for the meeting room and the Workshop Committee hereby conveys its appreciation for their support and assistance. We were once again fortunate in securing the voluntary services of Mr. David R. Foust, who performed the arduous task of recording the proceedings.

We have compiled what we anticipate will be a useful working document for those actively engaged in or planning biomechanics research.

In accordance with the consensus of the workshop participants we incorporate, as in our previous report, only informal material in these proceedings. We stress that the discussions included herein SHOULD NOT BE REFERENCED IN PUBLISHED DOCUMENTS.

An addendum has been included which contains relevant material not submitted in time for the 1975 workshop.

Arthur E. Hirsch, Chairman  
International Workshop on  
"Human Subjects for  
Biomechanical Research"

## CONTENTS

|  |     |
|--|-----|
| <u>MEETING MINUTES</u>   | 1   |
| <u>COMMITTEE REPORTS</u>   |     |
| Guidelines for the Comparison of Human<br>and Human Analogue Biomechanical Data  | 17  |
| Anthropometric Considerations for<br>Biokinematic Research   | 27  |
| Head Injury Evaluation: Criteria for<br>Assessment of Field, Clinical and<br>Laboratory Data   | 69  |
| On the "Abbreviated Injury Scale" and<br>"Injury Severity Score"   | 81  |
| Thoracic Injury Scale as Regards<br>Bone Fractures   | 86  |
| Ethics Resolution  | 89  |
| <u>TECHNICAL DISCUSSIONS</u>   |     |
| A Pelvic Anatomical Coordinate System<br>Padgaonkar A.J., et al.   | 93  |
| Discussion of the Paper Entitled "Measurement<br>of Angular Acceleration of a Rigid Body Using<br>Linear Accelerometers"<br>Liu, Y. King | 103 |
| Validation of Minimum-Input<br>3-D Motion Measurement<br>Alem, N.M.  | 106 |
| Nine Axis Mouthpiece Accelerometer Transmitter<br>Konigsberg, E.   | 134 |
| Calibration Techniques for Rotational Accelerometers<br>Eppinger, R.H.   | 137 |
| Development of an Ultrasonic Chest Deflectometer<br>Peel, H.H.   | 140 |
| Thoracic Instrumentation for Kinematic Studies<br>Robbins, D.H.  | 142 |

1  
2

3  
4

|  |     |
|--|-----|
| Proposed Rib Tests<br>Eppinger, R.H.   | 150 |
| Characterization of Skeletal Bone Conditions<br>Tarriere, C. et al.                            | 152 |
| Arterial Pressurization in Cadavers in Impact<br>Study<br>Ziperman, H.H. et al.                | 155 |
| Description of HSRI High-Speed X-ray<br>Cineradiography System<br>Bender, M., and Melvin, J.W. | 157 |

ADDITIONAL CONTRIBUTIONS

|   |     |
|---|-----|
| The Application of Mechanical Impedance Testing<br>and Bone Mineral Measurement to Skeletal Studies<br>Evaluation of Human Cadavers<br>Orne, D. | 163 |
| Resolution and Accuracy Estimates for Nine<br>Axis Accelerometer Configuration<br>Titlow, J.  | 173 |
| Measurement of Angular Acceleration of a Rigid<br>Body Using Linear Accelerometers<br>(Authors' Closure) Padgaonkar, K.W., et al.               | 177 |
