Oral Paper

Biomechanics #1: Crash Injury Mechanisms and Human Modeling

PaperNo.13-0381-O  
A Parametric Study of Far-Side Restraint Mechanics

PaperNo.13-0445-O  
Importance of Including a Fetus in Pregnant Occupant Models

PaperNo.13-0197-O  

PaperNo.13-0376-O  
Human FE Model to Estimate Head Contact Time for Pediatric Protection

PaperNo.13-0208-O  
Importance of Muscle Activations for Biofidelic Pediatric Neck Response

PaperNo.13-0366-O  
Development of a Finite Element Model of 5th Percentile Female with Multiple Muscles and Its Application to Investigation on Impact Responses of Elderly Females

PaperNo.13-0163-O  
Evaluation of an Active Multi-Body Human Model for Braking and Frontal Crash Events

PaperNo.13-0209-O  
An Evaluation of Objective Rating Methods for Full Body Finite Element Model Comparison to PMHS Tests

PaperNo.13-0288-O  
Study of Compression-Related Lumbar Spine Fracture Criteria Using a Full Body FE Human Model

PaperNo.13-0342-O  
Chest Injury Criterion: An Update of the Equivalent Deflection (Deg)

PaperNo.13-0372-O  
Mechanism of Reducing Thoracic Deflections and Rib Strains Using Supplemental Shoulder Belts During Frontal Impacts

Testing and Modeling of Structural Performance in Frontal Crashes

PaperNo.13-0007-O  
How to Obtain Equivalent Occupant Protection Levels Independently of Vehicle Mass and Size?

PaperNo.13-0046-O  
The Development of a Small Overlap Frontal Crash Evaluation Test

PaperNo.13-0104-O  
Proposal for a Frontal Impact and Compatibility Assessment Approach Based on the European FIMCAR Project

PaperNo.13-0135-O  
Occupant Behavior in Small Front Overlap Event - A Parametric Study

PaperNo.13-0206-O  
Modeling of Material Orientation Effect on AHSS Crash and Fracture Behaviors in Axial Crash Tests

PaperNo.13-0237-O  
Advanced FE Modeling of Vehicle Interior Structures to Enhance the Prediction for Crash Induced Injury Risk of the Occupant

PaperNo.13-0255-O  
The Crashworthiness of Minicars in Frontal Impact Tests

PaperNo.13-0294-O  
Severe Partial Overlap Crashes – a Methodology Representative of Car to Car Real World Frontal Crash Situations

PaperNo.13-0302-O  
Design Drivers for Enhanced Crash Performance of Automotive CFRP Structures
PaperNo.13-0321-O  Energy Dissipation and Structural Integrity in Frontal Impact
PaperNo.13-0402-O  Assessment of an Oblique Moving Deformable Barrier Test Procedure
PaperNo.13-0442-O  Parametric Study Using the OLC to Qualify the Severity of the Full-Width Rigid Test and Design an Improved Front-End
PaperNo.13-0448-O  Objective Rating Metric for Dynamic Systems
PaperNo.13-0079-O  Repeatability of IIHS Frontal Small Overlap Tests

Crash Avoidance #1: Safety Performance and Effectiveness of Driver Assistance Technologies, Test & Evaluation Procedures, Benefits Assessment

PaperNo.13-0126-O  Collision Avoidance Features: Initial Results
PaperNo.13-0194-O  Advanced Brake Assistance – Real-World Effectiveness of Current Implementations and Next Generation Enlargements by Mercedes-Benz
PaperNo.13-0186-O  A One Year Pay-As-You-Speed Trial with Economic Incentives for Not Speeding
PaperNo.13-0414-O  EDR Pre-Crash Data: Potential for Applications in Active Safety Testing
PaperNo.13-0419-O  Evaluation of the Occupants' Protection During the Crash Phase Considering Pre-Crash Safety Systems – Results from the EC-Funded Project ASSESS.
PaperNo.13-0227-O  Method for Active Safety Benefits Estimation Using Advanced Event Data Recorders
PaperNo.13-0152-O  Potential Benefits of Autonomous Emergency Braking Based on In-Depth Crash Reconstruction and Simulation
PaperNo.13-0269-O  Implementation of Autonomous Emergency Braking (AEB), the Next Step in Euro NCAP’s Safety Assessment
PaperNo.13-0073-O  MUNDS: A New Approach to Evaluating Safety Technologies
PaperNo.13-0346-O  Detection of Driver Impairment from Drowsiness
PaperNo.13-0423-O  Verification of Proposed Driver Alcohol Detection Methodology of Electrodermal Activity Using Electroencephalograma and Patch Tests
PaperNo.13-0168-O  Autonomous Emergency Braking (AEB) Test Results
PaperNo.13-0405-O  European Project AsPeCSS – Interim Result: Development of Test Scenarios Based on Identified Accident Scenarios
PaperNo.13-0347-O  A Method for Developing AEB Systems Based on Integration of Virtual and Experimental Tools
PaperNo.13-0042-O  Controllability Assessment for Unintended Reactions of Active Safety Systems
PaperNo.13-0006-O  Safety Assessment of Autonomous Emergency Braking Systems on Unbelted Occupants Using a Fully Active Human Body Model
PaperNo.13-0090-O  Probabilistic and Holistic Vehicle States Prediction with Enhanced Driver Model and Application to Smart Cruise Control Systems
PaperNo.13-0110-O  Research in Evaluation Method for Pedestrian Pre-Collision System
PaperNo.13-0219-O  Joint Motion Pattern of Limb Moving Mannequin for Active Safety Vehicle Tests
Biomechanics #2: Advances in Crash Test Dummies, Instrumentation and Data Analysis

PaperNo.13-039-O Validation of THOR-NT Lower Abdomen Finite-Element Model
PaperNo.13-0130-O Response Comparison for the Hybrid III, THOR Mod Kit with SD-3 Shoulder, and PMHS in a Simulated Frontal Crash
PaperNo.13-0171-O An Advanced Thorax-Shoulder Design for the THOR Dummy
PaperNo.13-0327-O Thoracic Biofidelity Assessment of the THOR Mod Kit ATD
PaperNo.13-0333-O Sensitivity to Different Seating Positions of THOR-NT and Hybrid III in Sled Testing
PaperNo.13-0100-O The Repeatability and Reproducibility of the BioRID IIg in a Repeatable Laboratory Seat Based on a Production Car Seat
PaperNo.13-0207-O Proposed Neck Performance Corridors for the 6 and 10 Year Old in Frontal Impacts
PaperNo.13-0102-O Seat Pan Loading Differences Using a New Test Apparatus
PaperNo.13-0438-O Development of the Q10 10 Year-Old Child Crash Test Dummy
PaperNo.13-0138-O A Methodology for Generating Objective Targets for Quantitatively Assessing the Biofidelity of Crash Test Dummies
PaperNo.13-0081-O Investigation of a Relation Between External Force to Shoulder and Chest Injury of WorldSID and THUMS in 32 Km/h Oblique Pole Side Impact
PaperNo.13-0179-O Biofidelity Responses and Corridors in Oblique Side Impacts

Performance of Protection Systems for Children and Pedestrians

PaperNo.13-0021-O An Open Simulation Approach to Identify Chances and Limitations for Vulnerable Road User (VRU) Active Safety
PaperNo.13-0226-O Analysis of the Performance of Different Architectures of Forward Facing CRS with Integral Restraint System
PaperNo.13-0262-O Development of Pop-Up Hood System for Pedestrian Protection
PaperNo.13-0298-O Integrated ADAS Solution for Pedestrian Collision Avoidance
PaperNo.13-0335-O Research of CRS Side Impact Test Procedures Using an Acceleration Type Sled System
PaperNo.13-0344-O Virtual Testing Based Type Approval Procedures for the Assessment of Pedestrian Protection Developed Within the EU-Project IMVITER
PaperNo.13-0345-O Comparison of Pediatric and Young Adult Far-Side Head Kinematics in Low-Speed Lateral and Oblique Impacts
PaperNo.13-0357-O Pedestrian Protection Test and Results: Utilization for Regulations in Korea
PaperNo.13-0392-O Injury Mechanisms in Rear Seated Children Aged 9-17 Years and the

Testing and Modeling of Structural Performance in Frontal Crashes

PaperNo.13-0370-W  Small-Overlap Frontal Impacts Involving Passenger Cars in Germany
PaperNo.13-0356-W  Stamping Effect Application for Crash CAE Procedure with QUIKSTAMP
PaperNo.13-0336-W  Structural Performance: Challenges Within the Area of Tension Between Safety, Lightweight and Economics
PaperNo.13-0436-W  FIMCAR – Influence of SEAS on Frontal Impact Compatibility
PaperNo.13-0435-W  Occupant and Vehicle Response for Offset Pole Crash Scenarios
PaperNo.13-0434-W  Impact of Driver Assistance Systems on Safety and Repair
PaperNo.13-0418-W  Experimental Study for the Possibility of Using of External Inversion Crash Box on Sloped Crash Barrier

Crash Avoidance #1: Safety Performance and Effectiveness of Driver Assistance Technologies, Test & Evaluation Procedures, Benefits Assessment

PaperNo.13-0103-W  A Comparison of Vehicle Alert Modalities’ Time-To-Collision Warnings Triggered by the Vehicle’s Controller Area Network System
PaperNo.13-0234-W  Global Harmonisation of Test Procedures for Driver Assistance Systems
PaperNo.13-0221-W  Development of Equipment to Evaluate Pre-Collision Systems for Pedestrians
PaperNo.13-0204-W  Surrogate Target Development for Evaluating Pre-Collision Systems
PaperNo.13-0248-W  Safety ADAS - Pacemaker for Automated Driving
PaperNo.13-0154-W  A Study of Influence Factors of Head Restraints on Neck Injuries
PaperNo.13-0167-W  GIDAS-Aided Quantification of the Effectiveness of Traffic Safety Measures in EU 27
PaperNo.13-0159-W  Mathematical Analysis of Braking in Rear-End Crash Scenarios
PaperNo.13-0377-W  Innovative Test Methods and Facilities for Predictive Pedestrian Protection
Development of an Assessment Protocol for After-Market Speed Limit Advisory Devices

Safety Potential of ADAS – Combined Methods for an Effective Evaluation

Biomechanics #2: Advances in Crash Test Dummies, Instrumentation and Data Analysis

An Improved Method to Calculate Paediatric Skull Fracture Threshold
Updates of the Lower Extremity of THOR-NT 50th Finite Element Dummy to Mod-Kit Specification
Seat Optimization Considering Reduction of Neck Injuries for Female and Male Occupants – Applications of the EvaRID Model and a Scaled Down BioRID

Performance of Protection Systems for Children and Pedestrians

Rear-Facing Child Safety Seat Performance in Frontal NCAP Level Crashes
Minimizing the Risk of Lap/Shoulder Belted Children Submarining the Lap Belt in Frontal Crashes
Towards a World-Wide Harmonized Pedestrian Legform to Vehicle Bumper Test Procedure
Improved Safety of Bicyclists in the Event of a Collision with Motor Vehicles and During Single Accidents
An Equation for Generalizing from Impact Test Performance to Real-World Crashes
Impact of Correlated Color Temperature of Headlamps on Visibility
Pedestrian Kinematics – a Detailed Study from the AsPeCSS Project
Effect of Visibility and Pedestrian Protection Performance on Pedestrian Accidents
The New EU I-Size Regulation – Key Elements of the Side Impact Test Procedure
Child Advanced Safety Project for European Roads (CASPER), Better Knowledge and Better Tools to Improve the Real Protection of Children in Cars.

Testing and Modeling of Structural Performance in Side Impact and Rollover Crashes

Bumper and Grille Airbags Concept for Improved Vehicle Compatibility in Side Impact: Phase I
A Study on the Severity of the Proposed Korean NCAP AE-MDB Side Impact Test
A Study on Energy Absorption Characteristic and Head Injury Performance According to the Characteristic of Countermeasure and Space Between Interior and Body Structures
Reducing All-Terrain Vehicles (ATVs) Injuries and Deaths - A Way Ahead
A Comparison Study of Two Side Impact Dummies Based on the
Probability of Injury Risk Curves

Crash Avoidance #3: Vehicle Electronic System Safety: Controls, Cybersecurity and Automated Vehicles

Restraint System Design and Performance Challenges: Addressing the needs of diverse populations (age, gender, stature)

Electric Vehicle, Battery and Fuel Cell Safety

NCAP and Non-Regulatory Approaches for Improving Safety

Heavy Truck, Bus and Motorcycle Safety
PaperNo.13-0286-W  Simulation of Quad Bike (ATV) Rollovers Using PC-Crash to Evaluate Alternative Safety System
PaperNo.13-0292-W  The Comparative Testing of a Single and Double Ride Height Control Valve Suspension Control Systems

Assessment of New and Improved Field Data Collection, Analysis and Benefits Assessment Methods

PaperNo.13-0489-W  Towards a Global and Harmonized Database for In-Depth Accident Investigation in Europe: The Dacota Project
PaperNo.13-0371-W  Precrash Data Collection in NHTSA's Crash Databases
PaperNo.13-0480-W  Evaluation Method of the Effectiveness of Active Safety Technologies in Light Goods Vehicles Based on Real World Accidents Reconstruction
PaperNo.13-0094-W  Similarities and Differences Between Japan and the U.S. Distribution of Factors Influencing Injuries in Frontal Collisions Using Field Accident Data
PaperNo.13-0127-W  A Comparative Study Between EDR Speed and Actual Vehicle Speed by Vehicle Maneuver
PaperNo.13-0078-W  Pre-Crash Scenarios for Determining Target Populations of Active Safety Systems
PaperNo.13-0027-W  An Application of Weibull Analysis to Determine Failure Rates in Automotive Components
PaperNo.13-0182-W  Traffic Accidents in Shanghai - General Statistics and In-Depth Analysis
PaperNo.13-0187-W  Near-Crash Scenario in China Based on Shanghai Driving Data
